

FULVI BALM

Manages drug-resistant wound infections and symptoms of dry skin

FULVI-BALM gel with pure organic CHD-Fulvic Acid™ manages septicaemia and inflammatory symptoms associated with skin burns and deep cuts. It has a homogenise appearance and a soft velvet texture known for its excellent skin moisturising, anti-inflammatory and antimicrobial properties.

It has been proven as highly effective against a wide spectrum of drug-resistant and drug-sensitive bacteria, moulds and yeasts associated with serious open wound infections.

DIRECTIONS FOR USE

- Light topical application on and around infected/injured area
- Directly administered onto the wound
- Light massage of inflamed tissue if the skin is not broken

FULVI BALM

- Restores damaged tissue
- Consolidates pus formation for effective wound drainage and sanitizing
- Accelerates new tissue formation
- Accelerates anti-inflammatory processes
- Effective anti-inflammatory for muscle and joint injuries
- Prevents penetration of pathogens in burns and open wounds
- Prevents secondary septicaemia in trauma incidences such as burns and open wounds

INGREDIENTS

CHD-Fulvic Acid™ 880ml/L
Tea Tree Oil 1%
Glycerine 2%

Bestuur medisyneweerstandige wondinfeksies en simptome van droë vel

Fulvi-Balm gel met suiwer organiese CHD-Fulvic Acid™ (fulviensuur) beheer septisemie en inflammatoriese simptome wat verband hou met velwonde, sny- en skaafplekke. Dit het 'n homogene voorkoms en 'n sagte fluweeltekstuur wat bekend staan vir sy uitstekende vogtige, anti-inflammatoriese en antimikrobiële eienskappe.

Dit is bewys dat dit baie effektief is teen 'n wye spektrum van weerstandbiedende en medisyne-sensitiewe bakterieë en swamme wat verband hou met ernstige oop wondinfeksies.

GEBRUIKSAANWYSINGS

- Ligte uitwendige toediening op en rondom geaffekteerde/beseerde gebied
- Word direk aan die wond toegedien
- Ligte massering van ontsteekte weefsel as die vel nie gebreek is nie

FULVI BALM

- Herstel beskadigde weefsel
- Konsolideer etter vorming vir effektiewe wondreinerings en ontsmetting
- Versnel nuwe weefselvorming
- Versnel anti-inflammatoriese prosesse
- Effektiewe anti-inflammatoriese gel vir spier- en gewrigsbeserings
- Voorkom penetrasie van patogene in brandwonde en oop wonde
- Voorkom sekondêre septisemie in trauma-gevalle soos brandwonde en oop wonde

SAMESTELLING

Fulviensuur (CHD-Fulvic Acid™) 880ml/L
Tea Tree Oil 1%
Gliserien 2%
