

VETRICS Rescue⁺

SHAMPOO FOR DOGS

For the treatment of eczema, dry skin, allergic and atopic skin diseases.

SENSITIVE SKIN

- Relieves itching and irritation
- Cleanses, soothes and moisturises irritated skin
- Maintains skin barrier integrity and microbial balance
- Improves the function of the skin barrier to protect against allergens and pathogens such as bacteria and yeast

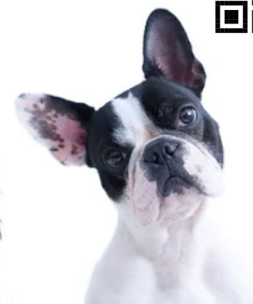

ACTIVE INGREDIENTS

Pure fulvic acid helps cell rejuvenation at every stage. It helps neutralize toxins and transport nutrients to the skin cells. Its antimicrobial and anti-inflammatory properties make it a very effective treatment for skin infections.

Carefully selected **essential oils** are valued natural remedies for treating bacterial and fungal skin conditions, preventing infection and promoting healing. They are known for their cleansing & soothing effect and have many germ-fighting properties.

VETRICS Rescue⁺

KIND TO SENSITIVE SKIN.

Fulvic acid is a potent topical treatment for skin conditions, including eczema. When using Fulvic Acid, it is crucial to pay attention to the purity of the product. That is why our products contain only pure CHD-FA™ (Carbo-hydrated Derived Fulvic Acid). CHD-FA™ is a highly recommended Fulvic Acid that is free of heavy metals and other toxins that may be potentially harmful to the body.

Discover everything that CHD-Fulvic Acid™ can do for you and your pets. Find more information on www.vetrics.co.za
